-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Specifically, claim 12 recites the limitation “flowing the flow medium through the cooling channel.” It is the position of the Examiner that Applicant is referring to the working medium 8, however it is unclear how that flow medium is flowing through the cooling channel as claimed. Clarification is required.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 5, 6 and 11-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Haje et al. (DE 19819508 A1). Haje et al. disclose a steam turbine comprising: a rotor 2 having a plurality of rotor blades 4; a plurality of guide vanes 6 spaced from the blades 4; and a casing shell 10 formed of a plurality of casing segments wherein at least one of the segments is

Art Unit: 3745

provided with at least one integrated cooling channel forming a cooling system 28. The cooling system uses steam as a cooling medium (Column 7, lines 18-34).

Claims 12 (as far as it is definite) and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Oeynhausen et al. (6,102,654). Oeynhausen et al. disclose a method for operating a steam turbine having a casing 15 comprising: providing at least one cooling channel integrated into the casing shell; at least partially admitting coolant 5 via the cooling channel to the casing shell delimiting the space for a flow medium 4; and admixing the coolant to the flow medium.

### ***CONCLUSION***

#### ***Allowable Subject Matter***

Claims 2-4, 7-10 and 15-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Prior Art***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kreitmeier (6,626,637) discloses a method for cooling turbines.
